

SW 35th Terrace flood control

Project Description:

The project proposes an emergency pump and pumping platform adjacent to an existing stormwater pond located on SW 35th Terrace in the SW Industrial Park.

A buried pressure pipe approximately 2,100 feet long will be constructed to discharge the water away from the pond prior to major storm events. The discharge location will be near the intersection of SW 47th Ave and I-75.

*See basin location map below.

Designer:

Water and Air Research; Gainesville, FL.

Contractor:

TB Landmark Construction;
Jacksonville, FL

Schedule:

The project was completed on May 2, 2012.

Project Manager:

John Veilleux, P.E.
