Email: waste@cityofgainesville.org

Schedule:

This program began August 8, 2011.

Description:

A new recycling program for e-scrap (electronic waste) collection has been implemented that will provide curbside collection of this material by disabled citizens working with ARC of Alachua County. Your participation can help ARC provide much needed jobs, while recovering valuable materials that would have been buried in a landfill otherwise.

E-scrap items include desktop computers and monitors, computer peripherals (keyboard, mouse, etc.), printers, faxes, and scanners, laptop computers, game systems, stereos/radios, tape recorders, televisions, telephone/answering machines, VCR/DVD players, power tools (no gas equipment), and microwaves.

The procedure is the same as white goods (appliances) which is to call **334-2330** and schedule for pickup. White goods are picked up on Wednesday and e-scrap is picked up on Friday.

To date, the pilot has resulted in an average of 1,000 pounds of e-scrap material being recycled per week.
