

## NE 19th Terrace Monitoring

### Description:

This project is intended to monitor the performance of the Filterra biodetention system constructed on NE 19th Terrace between NE 8th Avenue and NE 10th Avenue.

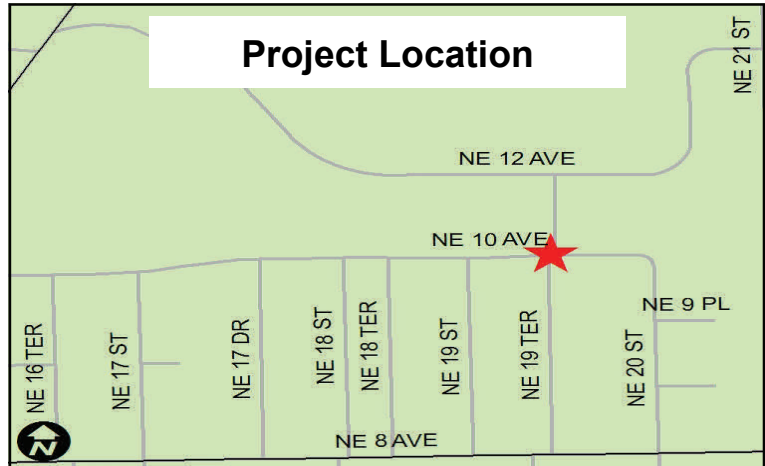

Monitoring of this new and innovative technology is a permit condition and will provide research into its effectiveness and potential for use on future projects.

### Monitoring Consultant:

John Sansalone, P.E., PhD;  
University of Florida

### Schedule:

Field work is complete and the final report preparation is underway. The project will be closed out by June 2013.

### Project Manager:

John Veilleux, P.E.
